

Get a HOSTED PABX))

...at a fraction of the cost

Advantages of Hosted PABX))

- No need to **buy expensive** PABX hardware.
- **Scale** your PABX as your company expands.
- **Simply add more telephone handsets.**
- **No more upgrading** or replacing outdated or too small PABX hardware!
- **Distribute phones** in multiple geographic locations, while **still being connected** to the same PABX.
- Receive **voicemail** messages as an **email** attachment in MP3 format.
- **Transfer calls** to the cellphone of travelling staff. WIRUlink can change the programming of your PABX remotely, **saving** you on **callout fees** and time to make a change in how the system routes your calls.
- **New features** are added to the WIRUlink hosted PABX **8 times per year.**
- The WIRUlink hosted PABX system runs on **multiple redundant** servers in a secure hosted environment.
- Single hardware/server failures, will **not** have any **impact** on your business.

About WIRUlink))

WIRUlink is a licensed telecommunications services provider, offering voice and data services to businesses and residential customers. The skills and experience of the WIRUlink network engineers enabled us to build one of the most advanced wireless networks in South Africa, that is connected to an extensive and growing fibre optic network. The network and all equipment are fully owned and managed by WIRUlink without making use of any third-party network. This enables us to better monitor, manage and maintain the network.
